- Turns any bike with rear rack into a capable grocery-getter
- Sized to fit a standard paper grocery bag
- Shoulder strap included, take it right into the store for easy shopping
- Reflective stripe helps to improve safety
- Folds up flat when not in use

GROCERY BAG PANNIER

Instructions:

First, securely attach the hook on the bag's elastic cord to the bottom of the bicycle's rear rack. Then use the nylon handle at the top of the bag to pull the bag up. Align the metal hooks at the top of the bag over the side rail of your bicycle's rear rack. Be sure that the elastic cord passes through one of the three positions under the nylon strap stitched flat near the bottom of the bag.

Before each ride, be sure the bag is securely attached to the rack and the load is secure and evenly distributed.

NOTE: This bag is designed for use on rear-mounted bicycle racks only and is not intended for rough off-road use.

When bag is not in use; snap the side nylon straps to the bottom of the bag to secure it in the flat folded position. To unfold the bag; unsnap the nylon side straps and push down on the floor of the bag. Keep the nylon side straps safely away from the bicycle's wheel by securing them to the snap buttons located on the back of the bag.
