

# LENS CHANGE INSTRUCTIONS

ECLIPSE

## Removing the lenses:

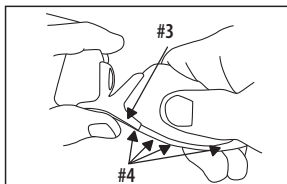

- #1 Hold the glass as shown and gently flex the frame downward at the outside.
- #2 Detach the lens out of the frame from the bridge area as shown. Follow by removing the outside lens point from the frame.

## Inserting the lenses:

- #1 Insert outside lens point into frame groove as shown.
- #2 Hinge inside point into the bridge groove.

- #3 Press the lens firmly into the bridge groove.
- #4 Make sure the top edge of the lens is lined up in the channel and support beam, and that the lens snaps into place at all points.
