Recall Information

Pedro's Bio Degreaser 14-ounce Aerosol Can

We were made aware of several instances in which cans containing this product were found to have ruptured or burst. Shortly after receiving this news, Pedro's initiated a series of laboratory tests to research the situation. It was concluded that the Bio Degreaser used in several batches was corroding the aluminum can wall and creating a weak point in the can resulting in potential rupture. This situation can be extremely hazardous.

Only Pedro's 14-ounce Aerosol cans with the 'Domed Shoulder' (figure 1) are affected by this problem. 14-ounce cans featuring the 'ridged shoulder' (figure 2) do not pose any risk; they are safe and can be sold as usual.

Pedro's popular Bio Degreaser will continue to be available in 12-ounce, 32-ounce, and 1 Gallon sizes. These items are not affected by this problem. We have already made needed adjustments to our Bio formula to ensure that this will not occur in future shipments of the 14-ounce Aerosol version.
